Subject Index of Volume 33

2213 PSYCCO

the Pb-Sr-Y-Ca-Cu-O superconduction system: preparation and characteristics, 67

Alloy

electronic structure of the quaternary alloy $\text{Ga}_x\text{In}_{1-x}\text{As}_y\text{P}_{1-y}$, 133

Aluminium oxide

infrared reflectivity study of the metastable solid solution $\text{Y}_2\text{O}_3\text{-Al}_2\text{O}_3$ on both sides of the yttrium aluminium garnet $\text{Y}_3\text{Al}_5\text{O}_{12}$ composition, 216

Annealing

effect of silicon implantation and annealing on oxygen in $\text{Y}_3\text{Al}_5\text{O}_{12}$, L10

Atomic growth

microstructural characteristics of (110) InGaAs layers grown by OMVPE, 148

Auger electron spectroscopy

evaluation of Ni-In-Ni multi-layers for thermally stable ohmic contacts to n-GaAs, 178

Barium plubates

thermodynamic stabilities of ternary oxides in the Ba-Pb-O system by the e.m.f. technique, 96

Batteries

new molecular routes for synthesizing titanium disulfide, 140

Bond structure calculations

electronic structure of the quaternary alloy $\text{Ga}_x\text{In}_{1-x}\text{As}_y\text{P}_{1-y}$, 133

theoretical investigation of the pressure dependencies of energy gaps in InAs and InSb, 122

Calcium stannate

chemical synthesis of calcium stannates from peroxo precursors, 156

Ceramics

chemical synthesis of calcium stannates from peroxo precursors, 156

low voltage varistors based on SrTiO_3 ceramics, 58

Chalcogenides

growth and characterisation of single crystals in the series $\text{ZrS}_x\text{Se}_{2-x}$, 115

Cleaning solution

a comparative secondary ion mass spectrometry technique for evaluation of metallic impurity on silicon surface, L1

Clusters

new investigation of III-V compounds by the low-angle mid-IR light-scattering technique, 103

Contact resistance

evaluation of Ni-In-Ni multi-layers for thermally stable ohmic contacts to n-GaAs, 178

Defects

study of deep level defects behaviour in rapid thermal annealed Fe-doped semi-insulating InP, 188

Diffraction

growth and characterisation of single crystals in the series $\text{ZrS}_x\text{Se}_{2-x}$, 115

Diffusion

effect of silicon implantation and annealing on oxygen in $\text{Y}_3\text{Al}_5\text{O}_{12}$, L10

Doping effects

growth of Si δ -doped GaAs by low pressure metal organic vapour phase epitaxy, 182

EDAX

growth and characterisation of single crystals in the series $\text{ZrS}_x\text{Se}_{2-x}$, 115

Electrical measurements

analysis of experimental problems connected with polarization conductivity measurements application to electronic and ionic transport, 75

GaAs implanted with silicon and carbon: electrical and optical characterization, 203

low voltage varistors based on SrTiO_3 ceramics, 58

Electron microscopy

microstructural characteristics of (110) InGaAs layers grown by OMVPE, 148

microstructure of thermoelectric SiGe alloys containing fullerite, 195

TEM/AFM study of the growth of $\text{La}_{2-x}\text{Sr}_x\text{Cr}_4$ thin films laser deposited on (100) SrTiO_3 substrates, 162

Electron states

electronic structure of the quaternary alloy $\text{Ga}_x\text{In}_{1-x}\text{As}_y\text{P}_{1-y}$, 133

theoretical investigation of the pressure dependencies of energy gaps in InAs and InSb, 122

EMF technique

thermodynamic stabilities of ternary oxides in Ba-Pb-O system by EMF technique, 96

Ex-situ annealing

the Pb-Sr-Y-Ca-Cu-O superconduction system: preparation and characteristics, 67

Film deposition

on-axis single-target sputter deposition of YBCO on Si and YSZ, 85

Fullerite

microstructure of thermoelectric SiGe alloys containing fullerite, 195

Gallium arsenide

evaluation of Ni-In-Ni multi-layers for thermally stable ohmic contacts to n-GaAs, 178

GaAs implanted with silicon and carbon: electrical and optical characterization, 203

growth of Si δ -doped GaAs by low pressure metal organic vapour phase epitaxy, 182

- new investigation of III-V compounds by the low-angle mid-IR light-scattering technique, 103
- Germanium
 - microstructure of thermoelectric SiGe alloys containing fullerite, 195
- Glass
 - analysis of experimental problems connected with polarization conductivity measurements applications to electronic and ionic transport, 75
- Grain boundaries
 - low voltage varistors based on SrTiO_3 ceramics, 58
- Graphite
 - optical and low frequency conductivity measurements on pure and mixed stages of graphite-ferric chloride intercalation compound, 211
- High-temperature superconductors
 - on-axis single target sputter deposition of YBCO on Si and YSZ, 85
 - TEM/AFM study of the growth of $\text{La}_{2-x}\text{Sr}_x\text{Cr}_4$ thin films laser deposited on (100) SrTiO_3 substrates, 162
- Hydride
 - TiMn_2 -based alloys as high hydrogen storage materials, 53
- Hydrogen
 - TiMn_2 -based alloys as high hydrogen storage materials, 53
- Indium phosphide
 - new investigation of III-V compounds by the low-angle mid-IR light-scattering technique, 103
 - study of deep level defects behaviour in rapid thermal annealed Fe-doped semi-insulating InP, 188
- Infrared spectroscopy
 - infrared reflectivity study of the metastable solid solution $\text{Y}_2\text{O}_3\text{-Al}_2\text{O}_3$ on both sides of the yttrium aluminium garnet $\text{Y}_3\text{Al}_5\text{O}_{12}$ composition, 216
- InGaAs layers
 - microstructural characteristics of (110) InGaAs layers grown by OMVPE, 148
- Intercalation
 - optical and low frequency conductivity measurements on pure and mixed stages of graphite-ferric chloride intercalation compound, 211
- Interfacial stress
 - development of thermally stable Ni-Ag interconnections for application to resistive films, L6
- Ion implantation
 - effect of silicon implantation and annealing on oxygen in $\text{Y}_3\text{Al}_5\text{O}_{12}$, L10
 - GaAs implanted with silicon and carbon: electrical and optical characterization, 203
- Ionic conduction
 - development of electrochemical cells based on $(\text{PEO} + \text{NaYF}_4)$ and $(\text{PEO} + \text{KYF}_4)$ polymer electrolytes, 173
- Ions
 - analysis of experimental problems connected with polarization conductivity measurements application to electronic and ionic transport, 75
- Iron
 - study of deep level defects behaviour in rapid thermal annealed Fe-doped semi-insulating InP, 188
- Lattice dynamics
 - vibrational modifications on lithium intercalation in V_2O_5 films, 168
- Layer structure
 - growth and characterisation of single crystals in the series $\text{ZrS}_x\text{Se}_{2-x}$, 115
 - optical and low frequency conductivity measurements on pure and mixed stages of graphite-ferric chloride intercalation compound, 211
- Lithium
 - modification of lithium niobate crystals using vapor phase transport equilibration technique, 91
- Lithium intercalation
 - vibrational modifications on lithium intercalation in V_2O_5 films, 168
- Manganese
 - TiMn_2 -based alloys as high hydrogen storage materials, 53
- Metallic impurity
 - a comparative secondary ion mass spectrometry technique for evaluation of metallic impurity on silicon surface, L1
- Metastable phases
 - infrared reflectivity study of the metastable solid solution $\text{Y}_2\text{O}_3\text{-Al}_2\text{O}_3$ on both sides of the yttrium aluminium garnet $\text{Y}_3\text{Al}_5\text{O}_{12}$ composition, 216
- MOCVD
 - growth of Si δ -doped GaAs by low pressure metal organic vapour phase epitaxy, 182
- Nickel
 - development of thermally stable Ni-Ag interconnections for application to resistive films, L6
 - evaluation of Ni-In-Ni multi-layers for thermally stable ohmic contacts to n-GaAs, 178
- Niobium oxide
 - modification of lithium niobate crystals using vapor phase transport equilibration technique, 91
- Optical properties
 - GaAs implanted with silicon and carbon: electrical and optical characterization, 203
 - optical and low frequency conductivity measurements on pure and mixed stages of graphite-ferric chloride intercalation compound, 211
- Oxygen desorption
 - superconductivity at 97 K in $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_y$ system, 192
- Oxygen stoichiometry
 - the Pb-Sr-Y-Ca-Cu-O superconduction system: preparation and characteristics, 67
- Phase diagram
 - thermodynamic stabilities of ternary oxides in the Ba-Pb-O system by the e.m.f. technique, 96
- Phase separation
 - microstructural characteristics of (110) InGaAs layers grown by OMVPE, 148
- Phase transitions
 - theoretical investigation of the pressure dependencies of energy gaps in InAs and InSb, 122
- Polarization effects
 - analysis of experimental problems connected with polarization conductivity measurements application to electronic and ionic transport, 75
- Polymers
 - development of electrochemical cells based on $(\text{PEO} + \text{NaYF}_4)$ and $(\text{PEO} + \text{KYF}_4)$ polymer electrolytes, 173

- Precursor method
chemical synthesis of calcium stannates from peroxo precursors, 156
- Processing
new molecular routes for synthesizing titanium disulfide, 140
- Pyramidal layers
the Pb-Sr-Y-Ca-Cu-O superconduction system: preparation and characteristics, 67
- Quenching
superconductivity at 97 K in $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_y$ system, 192
- Raman scattering
vibrational modifications on lithium intercalation in V_2O_5 films, 168
- Schottky barriers
low voltage varistors based on SrTiO_3 ceramics, 58
- Secondary ion mass spectrometry
a comparative secondary ion mass spectrometry technique for evaluation of metallic impurity on silicon surface, L1
effect of silicon implantation and annealing on oxygen in $\text{Y}_3\text{Al}_5\text{O}_{12}$, L10
- Semiconductors
electronic structure of the quaternary alloy $\text{Ga}_x\text{In}_{1-x}\text{As}_y\text{P}_{1-y}$, 133
theoretical investigation of the pressure dependencies of energy gaps in InAs and InSb, 122
- Silicon
growth of Si δ -doped GaAs by low pressure metal organic vapour phase epitaxy, 182
microstructure of thermoelectric SiGe alloys containing fullerite, 195
- Silicon surface
a comparative secondary ion mass spectrometry technique for evaluation of metallic impurity on silicon surface, L1
- Silver
development of thermally stable Ni-Ag interconnections for application to resistive films, L6
- Single-step synthesis
the Pb-Sr-Y-Ca-Cu-O superconduction system: preparation and characteristics, 67
- Sintering
chemical synthesis of calcium stannates from peroxo precursors, 156
- Sol-gel
new molecular routes for synthesizing titanium disulfide, 140
- Sputtering
on-axis single target sputter deposition of YBCO on Si and YSZ, 85
- Stoichiometry and homogeneity
modification of lithium niobate crystals using vapor phase transport equilibration technique, 91
new investigation of III-V compounds by the low-angle and mid-IR light-scattering technique, 103
- Superconductivity
superconductivity at 97 K in $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_y$ system, 192
- Surface roughness
TEM/AFM study of the growth of $\text{La}_{2-x}\text{Sr}_x\text{Cr}_4$ thin films laser deposited on (100) SrTiO_3 substrates, 162
- Thermal expansion
superconductivity at 97 K in $\text{Bi}_2\text{Sr}_2\text{Ca}_1\text{Cu}_2\text{O}_y$ system, 192
- Thermal properties
development of thermally stable Ni-Ag interconnections for application to resistive films, L6
study of deep level defects behaviour in rapid thermal annealed Fe-doped semi-insulating InP, 188
- Thermodynamics
thermodynamic stabilities of ternary oxides in the Ba-Pb-O system by the e.m.f. technique, 96
- Thermoelectric
microstructure of thermoelectric SiGe alloys containing fullerite, 195
- Thin films
development of electrochemical cells based on $(\text{PEO} + \text{NaYF}_4)$ and $(\text{PEO} + \text{KYF}_4)$ polymer electrolytes, 173
TEM/AFM study of the growth of $\text{La}_{2-x}\text{Sr}_x\text{Cr}_4$ thin films laser deposited on (100) SrTiO_3 substrates, 162
vibrational modifications on lithium intercalation in V_2O_5 films, 168
- Titanium
 TiMn_2 -based alloys as high hydrogen storage materials, 53
- Titanium sulphide
new molecular routes for synthesizing titanium disulfide, 140
- Vanadium oxide
vibrational modifications on lithium intercalation in V_2O_5 films, 168
- X-ray
on-axis single target sputter deposition of YBCO on Si and YSZ, 85
- X-ray spectroscopy
development of electrochemical cells based on $(\text{PEO} + \text{NaYF}_4)$ and $(\text{PEO} + \text{KYF}_4)$ polymer electrolytes, 173
- Yttrium
infrared reflectivity study of the metastable solid solution $\text{Y}_2\text{O}_3\text{-Al}_2\text{O}_3$ on both sides of the yttrium aluminium garnet $\text{Y}_3\text{Al}_5\text{O}_{12}$ composition, 216
